

Ministry of Foreign Affairs and Worship of the Free Socialist State of Paloma

To: Cycoldian Monarch
In regards to: Pulau Tekukor

To whomever this reaches whether monarch or correspondent greetings, It has come to the attention of the Paloman Government and legal bodies that the Cycoldian Crown has attempted to claim Paloman territories in Paloman Malaya (Pulau Tekukor).

After an evaluation of the claimed evidence of a legal claim to the island dating before any others using metadata investigatory measures the Government of Paloma along with the Chief Justice in Paloma are in agreeance that said evidence provided by the Cycoldian government was forged and purposely made to be misleading.

The Paloman Government does not appreciate the forging of legal documents, treaties and legislatures including that outside of its jurisdiction. The Government refuses to stand idly by such actions and denounces it.

According to the National Security Act of 2021, “Separating the provinces, territories or any other part of the Free Socialist State of Paloma from the Free Socialist State of Paloma; altering by unlawful means the legal status of Paloma; or surrendering any other part of the Free Socialist State of Paloma to a foreign country” and “A person who organises, plans, commits or participates in any of the following acts by force or threat of force or other unlawful means with a view to subverting the State power shall be guilty of an offence: overthrowing or undermining the basic system of the Free Socialist State of Paloma established by the Constitution of the Free Socialist State of Paloma; overthrowing the body of federal power of the Free Socialist State of Paloma; seriously interfering in, disrupting, or undermining the performance of duties and functions in accordance with the law by the body of federal power of the Free Socialist State of Paloma; or attacking or damaging the premises and facilities used by the body of power of the Free Socialist State of Paloma to perform its duties and functions, rendering it incapable of performing its normal duties and functions”. The Cycoldian Crown is in breach of these statues. Although the Government of Paloma cannot do anything currently with possible retaliatory/defensive options on the situation are being conversed.

As Minister, I am asking the Cycoldian Crown to cease and desist and back away from attempting mischievous behaviour towards the Paloman Government and its territories unless the government will be forced to act accordingly.

Wishing you good health,

Martel Sims

Minister of Foreign Affairs and
Worship of the Free Socialist State of Paloma
